MyLawyer provide a wide range of interactive legal documents, drafted by our in-house team of solicitors. MyLawyer is owned by Epoq, one of the best known and longest established legal document specialists in the world, the company behind the well known DesktopLawyer site. Our interactive legal documents cost a fraction of the cost of instructing solicitors, yet offer the full benefits of being completely interactive, with full guidance, together with the option of qualified solicitor review. The documents currently available include divorce, wills, probate, power of attorney, shareholders agreements, contracts of employment and many more from a full suite of documents which are constantly checked and updated.
